Figure 1. Schematic representation of the experimental design. The first part of the experiment consisted of a 10-min habituation period, followed by a 10-min test period. The test period was divided into two 5-min blocks. The first block was followed by a 5-min rest period. The second block was followed by a 5-min rest period. The second block was followed by a 5-min rest period. The second block was followed by a 5-min rest period.
